

Methyl Methacrylate (MMA): The use of this on nails is banned in Alabama and persons found to be using it will be fined and/or their licenses suspended. The FDA investigated personal injuries associated with the use of fingernail extenders containing MMA and “concluded that liquid methyl methacrylate was a poisonous and deleterious substance that should not be used in fingernail preparations.” The shop owner is responsible to make sure MMA is not used in the shop. Please see *Chapter 250-X-3.02 (5)*:

“No licensee shall use methyl methacrylate or any other product considered poisonous or unsafe.”
